Summary

Founder-operator turned applied AI engineer. Build production AI systems — multi-agent orchestration, RAG, and workflow automation — across EU funding, public-sector administration, and hospitality verticals. Stack: Python, FastAPI, Next.js, PostgreSQL, Redis, vector DBs, Docker, n8n, and multi-provider LLM routing (Claude / OpenAI / Gemini / local). 10+ years running operations, P&L, and €500K+ EU-funded projects. Ship-focused, autonomous, startup-ready.

Selected Projects

EuFund — AI funding & project-management platform

FastAPI · Next.js · Postgres · pgvector · Cloud Run · Claude / OpenAI / Gemini

Multi-agent pipeline (discovery → eligibility → drafting → compliance), RAG over EU programmes, multi-provider LLM routing with cost-aware fallback. Live deployment.

MitchAI — vertical operational AI for hospitality

Python · FastAPI · n8n · hybrid local + cloud LLMs · Docker

Ops / Media / Menu / Legal agents + orchestrator. HACCP automation, stock, marketing, ops copilots.

PrimarIA — Romanian municipal AI platform

FastAPI · Next.js · Postgres · vector retrieval · multi-LLM orchestration

Citizen + admin portals, role-scoped agents, audit-grade structured outputs for public-sector compliance.

AI Workflow & Infra Layer

Python · FastAPI · multi-provider routing · observability primitives

Reusable routing, retry, fallback, and structured-output validation primitives powering EuFund, PrimarIA, and MitchAI.

Experience

Founder & Applied AI Engineer — EuFund | 2025 – Present
